

HD SURVEILLANCE: GAMING

When investing in a surveillance system it is fair to insist on something that is reliable, functional and future proof. FS-Systems achieves this through offering the very best in High Definition IP Video Surveillance Solutions.

High Definition IP technology changes the way we use video surveillance solutions:

- Superior image quality offers indisputable evidence
- Improved video management software preserves complete image integrity through visually lossless compression
- Operator control centres perform quick searches delivering faster response times
- Cameras for any scene type imaginable, choosing from 1 to 30 megapixel IP cameras

FS-Systems partners with industry leading OEM suppliers to roll out powerful, robust, scalable and cost effective surveillance solutions. We can offer a cost effective way to migrate your current legacy system to a network based IP Video Surveillance System. The high definition surveillance systems designed and installed by FS-Systems are purpose engineered for select vertical market segments. Look to FS-Systems to customize your future proof, end-to-end surveillance solution today.
